SALESTORM

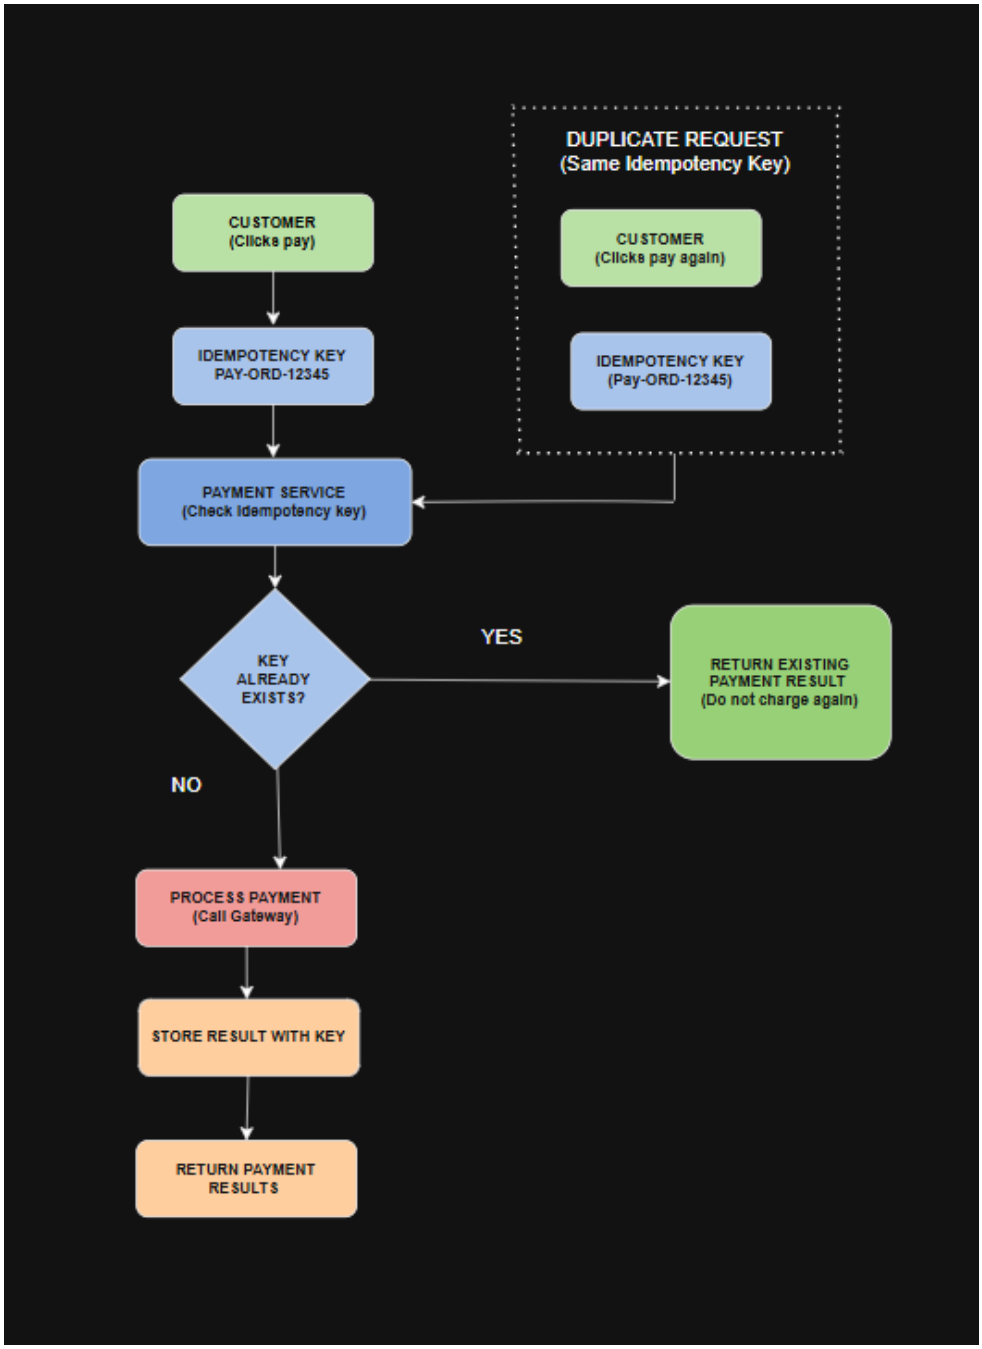

Stage 4 – Payment & Order Design

High-Traffic E-Commerce Flash Sale System
Architecture Design Document

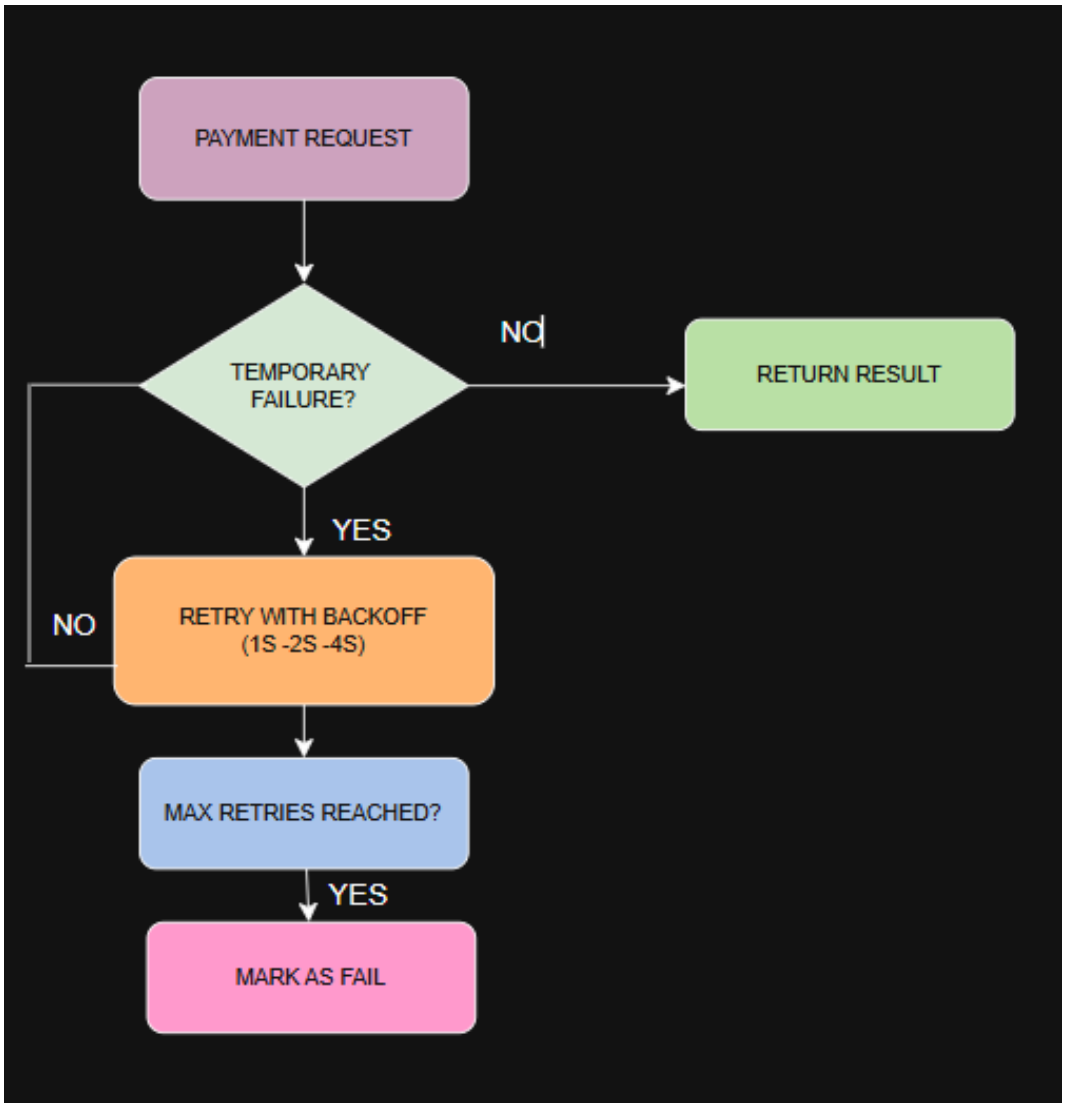

1)How should the system handle payment success, failure and timeout flows?

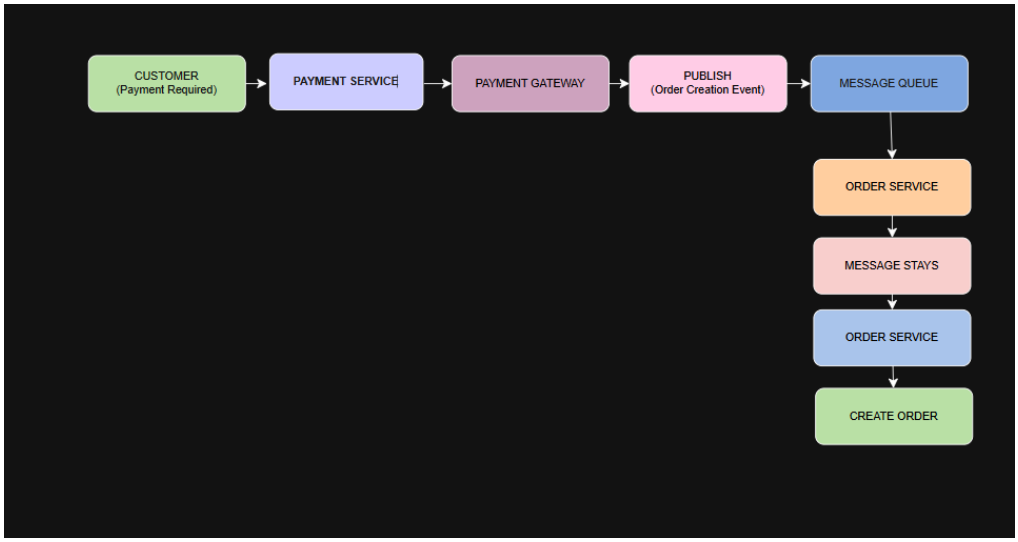

2)How can duplicate payments be prevented through idempotency?

3) How should retry, timeout and circuit-breaker behaviour be handled?

4) What happens when payment succeeds but the Order Service fails?

5) What are the valid order states, transitions, cancellation and recovery mechanisms?
